

DEFINING PROBLEM STATEMENT

Project title: Signs with Smart Connectivity for Better Road safety

Mentor Name: Mr.Sathya Vignesh

Team Members:

- Sowmya B (Team Leader)
- Shamyukdha P V
- Vijayalakshmi C V
- Vaishnavi N

Problem Statements :

1. In present Systems the road signs and the speed limits are Static.
2. But the road signs can be changed in some cases.
3. We can consider some cases when there are some road diversions due to heavy traffic or due to accidents then we can change the road signs accordingly if they are digitalized.

Solution Statement :

1. This project proposes a system which has digital sign boards on which the signs can be changed dynamically.
2. If there is rainfall then the roads will be slippery and the speed limit would be decreased.
3. There is a web app through which you can enter the data of the road diversions, accident prone areas and the information sign boards can be entered through web app.
4. This data is retrieved and displayed on the sign boards accordingly.
